

ALL-IN-ONE License Free Wireless LAN Solution

4ipnet offers ALL-IN-ONE License Free Wireless LAN Solution

4ipnet offers an ALL IN ONE Wireless LAN solution packing all capabilities needed by an Enterprise Grade Wireless LAN Solution in one comprehensive box. No need of additional Components & Gateways. 4ipnet Wireless LAN Controllers includes features such as,

- **Controller for AP & User Management**
- **Gateway for Traffic and Bandwidth control**
- **Gateway for Multi-WAN Connectivity & Load Balancing**
- **Webserver for Login Pages**
- **Monitoring system for users and devices and many more...**

There are NO RECURRING LICENSES or modules for any functionality. Comes with 2 Years Warranty & Life Time FREE Firmware Upgrade.

Traditional WLAN solutions require many different components that are difficult to deploy and manage. Traditional Wireless Solutions are complex and need multiple appliance to offer above features.

4ipnet offers Complete Wireless LAN Solution for all verticals such as Enterprise, Hospitality, Healthcare, Education, Banking to SMB.

Key features of 4ipnet includes

- **Centralized 4ipnet AP, Network, System & User Management:** Offers Complete Solution, NO NEED of any third-party software for User Management, Accounting, Authentication & Authorization.
- **Gateway for Multiple WAN Connectivity with Load Balancing:** No need of Additional Appliance for WAN Connectivity & Load Balancing.
- **Billing Plans:** Hourly, Daily, Weekly, Monthly & yearly billing plans for all users/employees. Can also provide Billing Report & Total Usage Statistics.
- **User level Bandwidth Limitation:** 4ipnet controller can offer limited bandwidth per user so that other user on the network will not be effected if one user is downloading huge video files. Concurrent Connections Limitation is also possible.
- **Avoids unauthorized traffic** on network by allowing internet Access to only one device per user/employee (Key Feature for large scale Staff Accommodation wireless)
- **User Activity Monitoring:** User Activity Monitoring is possible. User Events Logs & User HTTP Web Logs. Browsing History, Idle time & up time with Complete logs.
- **User Policies:** User Policies can be created based on Role, Time and Location.
- **Fast roaming between Access Point:** 4ipnet allows Fast Seamless Roaming between access points so that there is no dysconnectivity issues.
- **View Third Party AP's:** Allows you to view Any Existing Brand AP on a single Window. See whether they are working or Not
